

What is AWMAC?

The Architectural Woodwork Manufacturers Association of Canada was established in 1970. The main emphasis of AWMAC has always been to promote and improve quality standards while keeping pace with new products and technology in the architectural woodwork industry.

ARCHITECTURAL WOODWORK MANUFACTURERS ASSOCIATION OF CANADA

AWMAC is working to ensure.....

that our members supply and install
architectural woodwork to the highest
quality standards.

Glenlyon Business Park

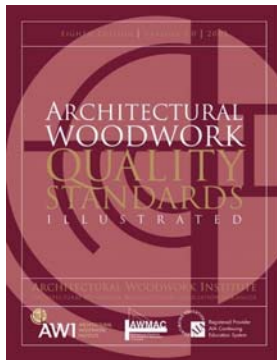

The Architectural Woodworking Industry welcomes you

Promoting quality workmanship

Architectural woodwork blends traditional woodworking with sophisticated computer skills. AWMAC promotes quality through the.....

Architectural Woodwork Quality Standards Illustrated Manual

The first Quality Standards manual was distributed in 1972. Subsequent editions of this manual have become the authoritative guide used as the national standards for designing, detailing and specifying architectural woodwork across Canada. The 8th edition, published in April 2003, is a joint venture between AWMAC and AWI.

The QSI is available from your local chapter

Ensuring that Quality Standards are met

The AWMAC Guarantee and Inspection Service program (GIS) is an integral part of our ongoing effort and commitment to a credible and prosperous architectural woodwork industry. The GIS is a national program designed to:

- ◆ Ensure that clients/owners get value and quality for their money.
- ◆ Guarantee that the architectural woodwork meets AWMAC Quality Standards.
- ◆ Help contractors avoid problems such as cost overruns, delays, deficient architectural woodwork and interpretation disputes.

AWMAC National GIS Office
