

It is extremely rare
that two interior spaces
are alike.

Mill-Right Woodworking Inc.

Architectural Woodwork, Fixturing & Casework

Our experience in architectural woodworking, fixturing and casework has allowed us to remain flexible and accommodating to our clients, while maintaining a specific focus on our areas of expertise. Our attention to detail and craftsmanship is what sets our work apart.

If you've been to Atlantic Canada, you have probably already had a meeting at one of our boardroom tables, or purchased something from one of our retail checkouts, ordered wine from a Mill-Right wine rack, or been assisted at one of our client's custom designed kiosks.

The Vault

Retail Fixturing:

Retail Fixturing creates an important link between our client's products and their customers. Millwork and cabinetry serve two important purposes; to functionally and practically display merchandise, and to create an aesthetic atmosphere which reflects the retail image and desired environment.

RCS Corporate Offices

Corporate Offices:

In a Corporate Office environment, millwork and cabinets serve two functions; they provide storage spaces and work surfaces crucial to conducting business. They also form the physical basis for the "look and feel" of the corporate work space, which can have a positive impact on the work environment as a whole.

Il Mercato Restaurant

Commercial Custom Millwork:

Often in a millwork project, the client wants a "custom feature item" included in the package. This can be a uniquely designed reception desk, a boardroom with exotic wood finishes and paneling, or a distinctive kiosk for a mall or foyer setting. Such a signature piece is designed to receive attention, from both the client and their clientele.

Teachers Credit Union

Commercial Institutional Environments:

Cabinets and millwork in an Institutional setting have to be functional, durable and efficient. They must stand up to heavy usage and it is often required that such pieces meet strict environmental standards. Recent technical advances have allowed the application of laminates through a spray finishing process, a viable and attractive finishing option.

Onyx Bar & Grill

Hospitality Environments:

There are special challenges in producing millwork for hotels, restaurants, bars and spas. Our hospitality clients require functionality and aesthetic good looks, while operating in a public and often rigidly-defined environment. To achieve the design vision of a hospitality space, Mill-Right works closely with clients, designers and manufacturers to ensure all these requirements can be combined into a quality installation.
